Natural, sustainable and eco-friendly promotional gifts

The GO GREEN collection helps you achieve your promotional goals in a more sustainable way. Our products marked with green material icons provide greener alternatives to traditional items. They are fully or partially made of natural, sustainable or recycled materials or provide a more durable substitute to a normally disposable everyday item.

GO GREEN

The greener choice

As we think about our future, it is important to make the meaningful decisions today. Year by year, we increse the amount of products made by sustainable and recycled materials. Not only do these items help to reduce the waste generated during production, their increased sustainability prevents the overuse of natural resources. We hope our GO GREEN collection will motivate many to think about the environment and will help maintaining an eco-friendly image.

be Creative

BE CREATIVE is a special product collection that lets you create perfectly customized and truly unique promotional gifts. These items give you the freedom to present your brand with bold, full-colour designs that can be easily integrated into your corporate image. Some of the BE CREATIVE items even give you the opportunity to mix and match the colour and material of the product parts or design your custom shape to make them more outstanding.

Find inspiration among our illustrations – we use various natural and geometrical patterns as well as graphics of animals in vivid colours to illustrate the high level of customisation possibilities.

This showcase only represents a small selection of the BE CREATIVE products; you can find many more throughout the following chapters of the catalogue.

UNIQUE

The BE CREATIVE Collection lets you create unique and memorable messages and images by offering a high degree of customisation.

INNOVATIVE

The BE CREATIVE Collection consists of special products, developed and hand-picked with creativity and special customisation in mind. Imprints are almost entirely made with digital technologies, ensuring colourful and high-resolution prints.

ACCESSIBLE

BE CREATIVE products are custom-made in our in-house production facilities or assembled from our stock of parts. They are manufactured, assembled or printed in Europe. This ensures short delivery time and low minimum order quantity, even for entirely custom-made products.

Compliance and quality commitment

Our catalogue presents a wide range of products that were sourced and manufactured with special care to ensure the quality, safety, and compliance with European requirements, as well as with various product-specific standards.
Declaration of Conformity documents and laboratory test reports are available as an assurance of product compliance with applicable European regulations.

The displayed icons are graphically designed therefore may differ from legal icons.

COPPER INSULATION FOR THE PERFECT TEMPERATURE

A copper lining on the inside of stainless steel vacuum flasks does wonders to your beverages. Copper provides an exceptional temperature retention for hot or cold drinks, while their stainless steel outer wall makes them exceptionally durable. They are easy to clean, making them the perfect choice for office settings or other business environments. Never settle for lukewarm drinks again!

BAGS
and Travel

Start with a confident step! Whether people go to the mall, do the daily workout or go on a lovely picnic in the park, a shopping bag, backpack or cooler bag will be their companion. Provide them with colourful or sustainable bags and travel accessories to make sure your brand is noticable in public places.

THE CORNERSTONE OF PROMOTIONAL GIFTS

Cotton shopping bags are among the most popular promotional items. They are perfect for holding other accessories when you give away gift sets, or for promoting at public places. A branded cotton bag will guarantee that your logo is easily noticed, while their sturdiness and practicality make them especially attractive.

DON'T WASTE THE WASTE

Paper recycling aims to counteract the fact that trees are not replanted or cannot grow fast enough to provide enough material for general paper usage. You can act on this problem while making a positive statement about your company and brand with our recycled paper pens. Dedicate your image to sustainability and customers will dedicate their attention to you.

Find the basic version of CreaClip in 4 colours on page 258.

PRINTING TECHNOLOGIES

Choosing the best gift - from our wide product collection - for your promotional needs is only half of the success equation. The appearance of your logo or message carries equal importance. In order to ensure the realisation of your brand image, we provide various printing technologies, ranging from traditional methods to state of the art digital technologies.

The following guide aims to give you a brief overview of our labelling techniques and to help you pick the best for your selected item.

P PAD PRINTING

Pad printing is the most popular, traditional ink-based labelling method. This technology uses a silicone pad to transfer ink onto an item with fine details and high accuracy, applicable to a wide range of materials. Pad printing allows labelling curved surfaces.

S SCREEN PRINTING

Screen printing is a traditional ink-based labelling process, for flat or flattenable products, with high durability and colour accuracy. During the screen printing process ink is directly pressed on the product's surface through a gauze, then fixed with heat treatment.

RS ROTARY SCREEN PRINTING

Rotary screen printing is a special kind of screen printing for labelling bottles. The cylindrical screen printing machine rotates the product parallel with the gauze, resulting in continuous prints throughout the surface of the product.

T TRANSFER PRINTING

Transfer printing is based on traditional screen printing, however, instead of being directly screen printed onto an item, the design is printed onto transfer paper, then applied with a heat press. Transfer printing is applicable to a wide range of products and holds several advantages over screen printing.

DT DIGITAL TRANSFER

Digital transfer printing is a modern, full-colour alternative to traditional transfer printing. The design is printed in photo quality onto transfer paper with a special digital printer, then applied to the product with a heat press. Our digital transfer technology carries no limitation in size or shape of imprints.

SU SUBLIMATION PRINTING

Sublimation printing is a full-colour, digital labelling technique with photo quality. Designs are printed with special ink on a transfer paper, then heat-pressed onto the product's surface. Sublimation is only applicable to light coloured polyester and sublimation coated products.

OP INKJET OVERPRINTING

Inkjet overprinting is used to imprint flat surfaces in full-colour with a special high-speed inkjet printer. As inkjet overprinting does not utilise white inks, imprint colours may be effected by the base colour of the product. Inkjet overprinting is applicable to porous materials, such as paper, natural bamboo and wood.

UV UV LED PRINTING

UV LED printing is a full-colour, digital labelling process utilising UV-cured inks. Logos are directly printed on the product's surface in high-resolution, resulting in instant photo quality imprints.

RUV ROTARY UV LED PRINTING

Rotary UV LED printing is a digital, full-colour labelling process to create photo quality imprints directly on the surface of cylindrical and conical items, allowing a large imprint wrapping the item. Rotary UV LED imprints are coated with transparent varnish for an exquisite look and extra durability.

C CERAMIC PRINTING

Ceramic printing is used to label mugs, glasses and certain metal items using special ceramic paints fired at high temperature. The label is applied to the product similarly to transfer printing, then fired in a furnace.

WPC CERAMIC WHITE PRINITING

Ceramic white printing is a special full colour printing technology for white ceramic products, which is based on ceramic printing.

O DEBOSSING

Debossing is an elegant process that changes the surface of the material that has been debossed, through forming a 3D impression. This impression is achieved by pressing a specially-made die onto the product's surface.

E ENGRAVING

Engraving utilises lasers to mark a product's surface. The surface of the product practically burns in the process to develop the logo. Even small logos can be printed very accurately. Engraving is applicable to metal, wooden, glass and certain plastic products.

RE RAINBOW ENGRAVING

Rainbow engraving is a special laser engraving technology, utilising different wavelength laser beams to achieve coloured imprints on metal items, without the use of inks or chemicals.

ER ROTARY ENGRAVING

Rotary engraving utilises lasers to mark the surface of cylindrical products. With the help of a special rotary device the engraved product is rotated during the printing process, allowing a large imprint wrapping the item. Rotary engraving is applicable to metal, wooden, bamboo, glass and certain ceramic products.

DO EPOXY DOMING

Epoxy doming is a unique printing technology, using full-colour printed stickers covered with 2 component resin. As a result, the treated sticker will have a 3-dimensional look. Epoxy domed logos can be produced in custom shapes and are resistant to UV rays.

DG DIGITAL PRINTING

Digital printing is used to imprint paper products and paper inserts in photo quality. Paper inserts can be produced in various sizes and shapes.

VF VISION FILM PRINTING

Vision Film printing is a special printing technique for labelling sunglasses lenses. During the labelling process, a digitally printed and perforated film is applied enabling a high degree of customisation.

VS VINYL STICKER

Vinyl stickers are digitally printed full-colour, self-adhesive stickers applicable to various, otherwise hard to print, products. Vinyl sticker logos can be produced in various sizes and shapes.

BR EMBROIDERY

Embroidery is used to label textile products, resulting in durable and high-quality imprints, by an automatic embroidery machine which applies thread through needle stitches. Pantone matching is not achievable, due to limited thread colours.
